Methods: Agile, Scrum, Kanban, OKRs, SMART Goals, QA Standards, Test Automation Strategy, Technical Documentation, Risk Analysis, Data Governance.

PROFESSIONAL EXPERIENCE

VENTURIT INC. — Canada / Colombia · Remote

Engineering Project Manager Aug 2025 – Present

- Lead engineering delivery, product operations, software quality, workflow improvement, and cross-functional execution.
- Translate ambiguous requirements, delivery risks, and client needs into execution plans, reliable workflows, clear documentation, and stronger product outcomes.
- Collaborate with developers, QA, product owners, designers, and leadership to improve how software is planned, tested, documented, and delivered.
- Build automation frameworks and conduct manual, API, and performance testing using Xray, Postman, JMeter, LoadView, and AWS Device Farm.
- Review wireframes, prototypes, and web experiences with designers to ensure quality, consistency, and usability.

VENTURIT INC. — Canada / Colombia · Remote

Software Engineering Manager Feb 2024 – Aug 2025

- Promoted to direct more Engineering teams while still leading QA, harnessing cross-functional collaboration, mentorship, and leaner operational enhancements.
- Managed international inventory and asset allocation to optimize team productivity and minimize cybersecurity and intrusion risks.
- Spearheaded project bids and client proposals, reviewing documentation and delivering compelling presentations to potential clients.
- Led project recovery by addressing management constraints and unforeseen development issues, delivering within scope and timeline.

VENTURIT INC. — Canada / Colombia · Remote

Quality Assurance Manager → Business Systems Analyst Sep 2020 – Feb 2024

- Managed and mentored 16+ onshore/offshore engineers across multiple projects, technologies, and time zones.
- Allocated resources across 5+ concurrent projects, improving execution visibility and client satisfaction.
- Reported 229+ anomalies across 8 business systems, improving data quality, governance, and risk visibility.
- Identified legal/financial accounting risks, contributing to client financial goals for 2023–2024.
- Implemented Jira + Xray workflows across 5 projects, improving tracking, testing visibility, and delivery coordination.
- Built dashboards, KPIs, and reporting for productivity, capacity, and delivery health.
- Hired, onboarded, and mentored 5 engineers; scaled a Canadian QA branch from the ground up.
- Prevented service outages via test planning, automation coverage, documentation, and release controls.

LEYEND EXPERIENCE — Cali, Colombia • On-site

Digital Services Manager / Founder Jan 2018 – Sep 2020

- Founded and ran a digital-services brand delivering design, software development, and marketing.
- Designed brands/identities, built websites and sales funnels, and shaped business models for 3 companies.
- Managed client relationships, recruited project-based teams, and automated quotation systems.
- Served clients including 2B Elite and Active Leadership MX (Mexico), expanding services across Latin America.

UNIVERSIDAD ICESI — Valle del Cauca, Colombia

Programming Monitor Aug 2014 – Feb 2018

- Tutored Interactive Media Design and Industrial Design students in programming, algorithms, HCI, web development, Arduino, and IoT.
- Supported in-class and extracurricular learning across multiple programming subjects.
